

2025 Workshop on Matrices and Operators

A three-day conference organized in person at the Department of Mathematics,
University of Regina, Canada.

Dates: Tuesday, August 19 to Thursday, August 21, 2025

Registration is open now [Register Here](#) .

The purpose of this international workshop is to promote research and collaboration among researchers with an interest in matrix theory, operator theory, operator algebra, quantum information theory, and related topics. Participants are encouraged to present their latest findings and discoveries, and share their experiences and research problems, while fostering an atmosphere of collaboration and mutual learning. Through dialogue and knowledge exchange, the workshop aims to enhance the collective growth and development of the research community involved in matrix theory, operator theory, operator algebra, quantum information theory, and related fields. This series of workshop started in 2007 and ran annually until 2019. Because of COVID-19, the workshop was put to a halt, and just resumed in 2024. One may see the history of the workshop at <https://cklixx.people.wm.edu/mao-history.html>.

Funded by Faculty of Science at the University of Regina.
